An Education Budget is a blueprint for a School District’s priorities for the following school year. As we share these priorities with town leaders and the public, we would like to be as transparent as possible. This includes the extent and ease with which the public can access and understand our budget and provide feedback.

Approximately 80-85 percent of a school district’s budget represents fixed costs: salaries, benefits, transportation, energy, safety, etc. The remaining funds describe the specific strategies and resources we plan to allocate in order to improve educational opportunities for our students. The key steps in the budget process included the following:

- Identifying the District’s objectives and priorities
- Allocating resources based on priorities
- Presenting our budget to the Board of Education and Town leadership
- Involving the public throughout the budget process
- Acting on feedback that we receive from you
- Conducting a budget referendum to approve the budget

Please view the important dates listed to the left and attend these meetings. If you cannot attend meetings in person, we will offer many Facebook Live presentations where you ask questions in real time or watch at your convenience and leave questions in the comment section*. We hope to see you soon.
